The International Journal of Management Science

## Volume 8 1980
## Author and Title Index

● **Chief Editor**
**Professor SAMUEL EILON,**
DSc(Eng.), PhD

Department of Management Science,
Imperial College, London, SW7 2BX

● **Associate Editors**
**RJ BETTS** and **RB FLAVELL**

Department of Management Science,
Imperial College, London, SW7 2BX

**Editorial Advisory Board**

**Professor RJ BALL**
London Graduate School of Business Studies, Sussex Place, Regent's Park, London NW1 4SA

**Professor C WEST CHURCHMAN**
Space Sciences Laboratory, University of California, Berkeley, CA 94720

**Professor WW COOPER**
BEB 500, Department of Management, School of Business, University of Texas at Austin, Austin, TX 78712

**DAVID P DEZIEL**
Hickling-Smith Inc., Suite 605, 350 Sparks Street, Ottawa

**Professor BELA GOLD**
Department of Economics, Case Western Reserve University, Cleveland, OH 44106

**Professor CH GUDNASON**
Danmarks Tekniske Højskole, København

**Professor DOUGLAS C HAGUE**
Manchester Business School, Booth Street West, Manchester M15 6PB

**DAVID B HERTZ**
McKinsey and Company Inc., 245 Park Avenue, New York, NY 10017

**Professor KNUT HOLT**
The Norwegian Institute of Technology, 7034 Trondheim

**Professor HAROLD J LEAVITT**
Graduate School of Business, Stanford University, Stanford, CA 94305

**Professor GERALD J LIEBERMAN**
Department of Operations Research, Stanford University, Stanford CA 94305

**Professor RINTARO MURAMATSU**
Department of Industrial Engineering, Waseda University, 4-170 Nishiokubo, Sinjuku-ku, Tokyo 160

**NAOMI YAMAKI, President**
Mitsubishi Space Software Co Ltd, 2-4-1, Hamamatsu-Cho, Minato-Ku, Tokyo 105

Model for Multinational Corporate Money Management (Hollis) 95

Non-Executive Director (Editorial) 399
Note on Pricing and Promotional Strategies for a Firm Operating in Dual Markets (Morris) 699

Office of the Future—New Challenges for Operational Research (Sadleir) 21
On the Adoption of Technological Innovations in Industry: Superficial Models and Complex Decision Processes (Gold) 505
Optical Services in the UK: a Study of a Professional Labour Market (Jack/Alpine) 681
Optimal Loan Periods for Undergraduate Recommended Reading (Warwick/Taylor) 671
Optimizing Multi-Stage Production with Constant Lot Size and Varying Numbers of Batches (Szendrovits/Drezner) 623
Output Planning for Material Requirements Under Uncertainty (Ballou/Fisk/Ismail) 47

Pitfalls Galore (Editorial) 601
Planning a Crude Oil Supply Through Simulation (Batra) 493
Policies as Theories (Majone) 151
Priority Dispatching Rules in Job Shops with Assembly Operations and Random Delays (Sculli) 227
Process for Hierarchical Decision Making with Multiple Objectives (Banker/Gupta) 137

Rediscovering the Technological Foundations of Industrial Competitiveness (Editorial—Gold) 503
Relative Value of a Management Information System, a Simulation Study (Seppälä) 39
Reliability: Its Implications in Production Systems Design (Bennett/Jenney) 433
Review of Mathematical Models in Human Resource Planning (Price/Martel/Lewis) 639

Sequential Inventory Control Model with Seasonal Demand (Levary) 243
Simplified Algorithm for the Depot Location Problem (Gizelis/Samouilidis) 465
Socio-Political Forecasting and Management Information Systems (Higgins/Romano) 303
Solution of a Single Stage Machine Load Planning Problem (Caie/Linden/Maxwell) 355
Some Comments on Churchman and Ulrich's 'Reply' to the Status of the Systems Approach (Feedback—Bryer) 280
Status of the Systems Approach (Feedback—Mitroff) 280
Status of the Systems Approach: Reply to Bryer (Feedback—Churchman/Ulrich) 277
Stochastic Model of Industrial Fluctuations: an International Comparison (Anderson) 219
Stochastic Models of Industrial Buying Behaviour (Easton) 63
Strategic Adaptation as a Partially Rational Process (Ronchi) 661

Strengthening the Technological Capabilities of Domestic Industries: Pressures, Deterrents and Policy Alternatives (Gold) 583
Style Complementarity as a Design Criterion for Decision Aids (De Waele) 631
Survey of Goal Programming Applications (Lin) 115
System Dynamics Modeling (Sahin) 333

Transient and Steady State Results for Two Parallel Queues (Grassmann) 105

Vroom–Yetton Model of Leadership—Model, Theory or Technique (Feedback—Baker) 9

What Influences a Decision? Some Results from a Highly Controlled Defence Game (Daniel) 409

## Aims and Scope

The purpose of OMEGA is to provide a vehicle for reporting developments in management science, operational research and managerial economics, including research results and applications. Published material ranges from original contributions to review articles describing the state of the art in specific areas, together with shorter critical assessments of particular management techniques. Other features of the journal are the Memoranda section for short communications, Feedback (a correspondence column) and a register for theses and dissertations.

The journal is intended to serve the needs of practising managers, specialists in management services, operational research workers and management scientists, management consultants, academics, students and research personnel.

Contributions may be made in any of the following categories:

1. *State of the art.* These papers would normally be more than 5000 words long, devoted to an interpretation and evaluation of existing knowledge in a particular field or function of management. Such papers should aim to be valuable both to practising managers and also to research workers and should therefore include a detailed bibliography.

2. *Theory.* This category caters for papers in specialised fields, 1500–5000 words long, which report research results and new theoretical developments.

3. *Applications.* These papers describe interesting applications of management science techniques and should typically be 1500–5000 words in length.

4. *Memoranda.* This section is devoted to short contributions, preferably under 600 words, to preliminary communications for new ideas and propositions, technical notes, brief descriptions of internal research reports or theses/dissertations, extension or critique of widely accepted concepts, brief accounts of applications and implementation. The intention is to publish such memoranda with as little delay as possible. Items for Memoranda Section should have the minimum number of diagrams (preferably none if possible) and lists of references should also be pared to the absolute minimum.

5. *Feedback.* Correspondence is invited on issues of significance in the field of management. This need not necessarily relate to material previously published in OMEGA.

6. *International Register of Theses and Dissertations.* Information for inclusion in this Section should be presented in the style of the Journal.

**Annual Subscription Rates (1981)**

Published bi-monthly. For libraries, university departments, government laboratories, industrial and other multiple-reader institutions U.S. $160.00 per annum; 2-yr subscription rate $304.00 (including postage and insurance). *Specially reduced rates to individuals*: In the interests of maximizing the dissemination of material published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription may purchase a second or additional subscription for their use at the much reduced rate of U.S. $45.00 *per annum*. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A. and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England.

**Microform Subscriptions and Back Issues**

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

**Publishing Office**

Pergamon Press Ltd, Hennock Road, Marsh Barton, Exeter, Devon EX2 8RP, England

# *Special Notice*

To avoid simultaneous, multiple submissions to journals having similar interests, the Editors of *Management Science*, the *Journal of the Operational Research Society*, *Operations Research*, *Omega* and *Naval Research Logistics Quarterly* have developed a system of exchange submission lists.

Because refereeing capability is a scarce resource, we cannot tolerate the duplication of effort that follows from multiple submissions. We hope that the elimination of multiple submissions will make the refereeing process more efficient, and thereby decrease the time required for refereeing. This is a major objective of all five publications. Other journals with similar interests may be included in this information interchange.
